Phone	+61 300 365 800

DESCRIPTION OF BUILDING PRODUCT

Airco Brands supplies heavy-duty, polypropylene plastic window packers under the Titan brand. The packers are u-shaped with a bevelled leg end, are 45 mm, 75 mm, 90 mm and 140 mm in length and are supplied in a variety of thicknesses (colour-coded). Titan window packers are suitable for interior and exterior applications.

Window packers are also known as spacers and are installed at the sill to ensure that the joinery is level and supported. This is important as it increases security around the fixing point and supports the frame so it can be installed level (horizontally) and plumb (vertically). This in turn ensures that the joinery can be installed correctly, achieving weathertight junctions.

The U-shape allows for the 'legs' to straddle obstructions such as bolts, screws, nails, locating pins.

Titan window packers can be drilled, cut, nailed, stapled or screwed. They are supplied with a 4.5 mm countersunk fixing hole for a flush finish.

Although lightweight, Titan window packers can withstand a compressive load capacity up to 5 tonnes.

At the end of its life, the Titan packer can be recycled.

Products covered by this BPIR are identified with the prefixes WPKR45T, WPKR75T, WPKR90T, and WPKR140T.
